Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-3 are presented for examination.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is contains the trademark/trade name VIA 6868 and Intel 815. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe a chipset and, accordingly, the identification/description is indefinite.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim, USPGPUB No. US 2002/0135605.

5. In re claim 1, Kim shows a method of changing EDID of a memory of a motherboard in response to replacing an LCD panel of a computer with a different one [S1, S15 in fig 3; paragraph 0031], comprising the steps of:

detecting a chipset [S1, fig 3; paragraph 0031, line 12];

reading a SM bus base or GPIO (General Purpose Input Output) base [S1, fig 3; paragraph 0031, line 12];

activating a writing mechanism [S5 to S15, fig 3];

selecting compatible EDID [S5 to S13, fig 3];

writing the EDID into the memory [S15];

detecting an error [S11 and S13]; and

closing the writing mechanism [S15 and END in fig 3].

6. In re claim 2, Kim shows the EDID comprises a plurality parameters adapted to change [P7, S9 in fig 4].

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kim, USPGPUB No. US 2002/0135605, as applied to claims above.

Art Unit: 2182

In re claim 3, Kim does not show the step of determining whether the chipset is a VIA 6868 or Intel 815. However, VIA 6868 and Intel 815 are just one of many chipsets that are used in the art of computer and determining those chipsets are very well known in the art and necessary to configure the computer system. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to recognize that the step of determining whether the chipset is a VIA 6868 or Intel 815 in the Kim's system because it is well known in the art of computer, and necessary to configure the computer system.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Further references of interest are cited on Form PLO-892, which is attachment to this office action.
